

SAFETY AND HYGIENE PROTOCOLS DURING THE PANDEMIC

These procedures may be changed in light of the constant evolution of the covid-19 virus.

Important: We believe that by August 2021, vaccinations will be far advanced across much of the world, including Brazil. However, we will consider changing the dates of the residencies of the selected artists in light of the evolution and propagation of the Covid virus, including postponing the artists' residencies until 2022. We retain the right to cancel the residencies if we so determine. Our intention though is to support the selected artists as planned in 2021, or if need be, during 2022.

Property maintenance and cleaning procedures:

- For the weekly room cleaning, the staff will use Personal Protective Equipment (gloves, apron and face shield).
- On Mondays, Fellows should put their bedding and towels in plastic bags, tie them up and leave them in their bedroom.
- Cloth towels have been replaced by paper towels in all public bathrooms. (In individual bathrooms, cloth towels remain).
- Fellows should put their dirty clothes in plastic bags and leave them in the hall on Thursday mornings. The staff will sanitize the bags and take them to the laundry to be handled the next day. The staff will wash the Fellows' clothes individually.

- There will be containers with alcohol gel in all rooms and studios.

Procedures in the kitchen and dining room:

- Breakfast will be served in the dining room of the Casa Grande, to facilitate social distancing.
- The Fellows will have their places marked, to maintain social distancing.
- Fellows will wash their hands before meals and wear a mask while serving themselves. We ask that Fellows serve themselves in silence, even while masked.
- In the kitchen, the staff has reinforced hygiene habits, always using bleach and detergent.
- In the evening, Fellows should leave their dirty dishes in a bowl that will be available with a mixture of diluted bleach to soak dishes and silverwares.
- We ask that Fellows avoid crowding in the kitchen or in any other room.
- Fruits and vegetable will be stored in closed containers.
- The freezer, stove, sink and cabinets will be cleaned daily using bleach, detergent and hydrated ethyl alcohol 70°.
